

Made By Laravel

Beginner Web Project

GET STARTED

Initial Idea & Problem

- 01** MR-X is a web developer. He is a client/job hunter
- 02** He needs to solution that client can reach to him quickly
- 03** He wants to show his talent, experience publicly & want self branding

Requirement's

01 **Responsive Design**

The website should be mobile-friendly and adapt to different screen sizes, including desktops, tablets, and smartphones.

02 **User-Friendly Navigation**

Use a clear navigation menu that is easy to understand and navigate. Make it simple for visitors to find the different sections of your portfolio.

03 **Showcase Projects**

Display your projects prominently, including project names, descriptions, screenshots, and links to live demos or repositories on platforms like GitHub.

Requirement's

04 Project Details

Provide comprehensive details about each project, including the technologies used, your role in the project, challenges faced, and the outcomes or results achieved.

05 Skills and Expertise

Highlight your technical skills, programming languages, frameworks, and tools that you are proficient in. You can showcase these skills in a dedicated section or alongside each project.

06 About Me/Profile

Include an "About Me" section that introduces yourself, your background, and your passion for web development. You can also mention your education, relevant certifications, and any notable achievements.

Requirement's

07 Resume/CV

Make it easy for visitors to contact you. Include your email address, phone number (if comfortable), and links to your professional social media profiles like LinkedIn or GitHub. Consider adding a contact form for convenience

08 Clean and Professional Design

Use a clean and professional design that aligns with your personal brand. Choose an appropriate color scheme, typography, and layout that enhances readability and visual appeal

09 Loading Speed Optimization

Optimize your website to ensure fast loading times. Compress images, minify CSS and JavaScript files, and utilize caching techniques to improve performance.

Requirement's

10 SEO-Friendly

Implement basic SEO techniques, such as using relevant keywords in page titles, headings, and meta descriptions. This helps search engines understand and rank your website better.

11 Analytics and Tracking

Integrate web analytics tools like Google Analytics to track visitor behavior, such as page views, traffic sources, and user engagement. This data can provide insights into your website's performance and user preferences.

12 Accessibility

Ensure your website is accessible to people with disabilities. Follow web accessibility guidelines, such as providing alternative text for images and ensuring proper color contrast.

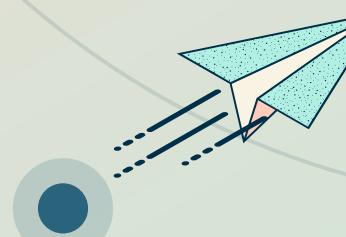

Requirement's

13 Remember

Remember, these requirements can be customized based on your specific preferences and goals. The key is to create a portfolio website that effectively showcases your skills, projects, and experience while providing a positive user experience for your visitors.

UI/UX

Contact Page

A smartphone screen displays a contact form template. The header reads "MR-X" and includes links for "Home", "Resume", "Projects", and "Contact". The main content area is titled "Get in touch" with the subtext "Let's work together!". It features four input fields: "Full name", "Email address", "Phone number", and a larger "Message" field. A blue "Submit" button is at the bottom. The footer contains copyright information "Copyright © Your Website 2023" and links for "Privacy", "Terms", and "Contact".
